AMOUNT

Population and Manpower Project  
(Bureau of Census)

  
25X1A1a

This project authorized by the DCI in 1948 as an intelligence function of common concern to IAC Agencies fulfills the following basic needs:

- (1) Population and labor force analysis on individual foreign countries with major emphasis on the Soviet orbit....(examples of projects and reports to date).
- (2) Projections of future population estimates for as many countries as possible (41 nations included in last projection).
- (3) Ad hoc support to particular intelligence projects and intelligence estimates being undertaken by IAC Agencies.

The sum requested for FY 1955 provides for an increase of one GS-3 clerk typist over previous needs plus pay act increases. With increased workload in the typing of reports this addition is felt to be absolutely necessary if planned production of reports is to be met.

BY L/C

This project is reviewed on an annual basis for purposes of re-evaluating the necessity for its continuation.
